

Course title:

Full Face Mask

Duration:

Two days

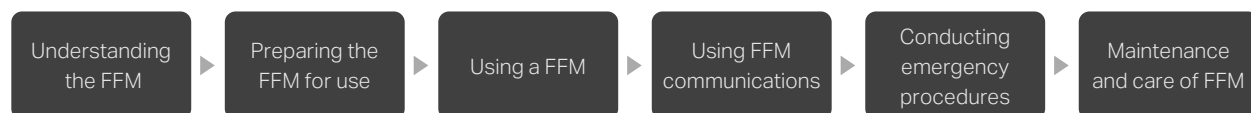

Course overview:

This course provides the underpinning knowledge for the safe use of a full-face mask for diving before going on to perform underwater diving tasks whilst wearing FFM. The theory lessons cover: the types of FFM, mask components, benefits, use cases and limitations of the mask and communications. Practical lessons teach students to undertake the preparations and checks of their equipment before applying this in water where they will practice the essential drills.

Course outcomes:

By the end of the course, participants will be able to:

- Explain the function and design of a full face mask
- Describe the operational use and limitations of a full face mask
- Explain basic safety, emergency response and maintenance procedures
- Inspect and assemble a full face mask before use
- Safely use a full face mask in water and able to undertake all techniques and drills
- Undertake all post dive checks and maintenance
